The right diagnosis

ImmunoQuery helps you discover the right diagnosis, whether you need a list of antibodies that will confirm your diagnosis or suggestions for diagnoses that have a similar staining.

Right now

Reach your diagnosis fast. Start with a diagnosis panel to discover the best antibodies to use, or start with an antibody panel to confirm a differential.

Convenient

Find your diagnosis using the antibodies you have on hand. Access ImmunoQuery quickly and easily through the online application.

Features

Get a differential diagnosis list

The Build Dx Panel feature lets you query up to three differential diagnoses to discover which antibodies will confirm your diagnosis.

Discover which antibodies to use

The Build Ab Panel feature lets you start with up to five antibodies to verify your differentials and identify other diagnoses that have a similar staining.

Analyze the results

Corroborate your antibody staining results with evidence in the literature.

Learn about a diagnosis

View the complete IHC profile of your diagnosis, including percent positivity of all antibodies tested, staining pattern, and a full list of references with abstract access.

Learn about an antibody

Learn about clones, company of origin, top diagnosis groups with this antibody staining, and the full list of references with abstract access.

Earn CME credit while you work

Users can now earn AMA PRA Category 1 Credit™ toward point of care learning for the queries they perform in ImmunoQuery.

Growing with the evidence

This year, ImmunoQuery includes more evidence-based data than ever. This means more antibodies, relationships, diagnoses, and cases to help you get it right—right now!

2,000,000+ cases

48,000+ antibody combinations

3,600+ antibodies

2,100+ diagnoses
